CLOUD INFRASTRUCTURE SERVICE LEVEL AGREEMENT

Contract Reference: **SLA-2026-CLOUD-001** • Effective Cycle: 2026 Monthly Retainer • Base Fee: **$100.00 USD**

This Service Level Agreement ("Agreement") is entered into between **Acme Cloud Services LLC** ("Provider") and **FinTech Enterprises Inc.** ("Customer"). This document defines measurable performance commitments, remedies, and automated PayPal settlement execution rules.

1. Performance Commitments & Service Thresholds

1.1 Availability Target: Provider guarantees that the API Gateway services will maintain a Monthly Uptime Percentage of at least **99.9%** during each calendar billing cycle.

1.2 Latency Benchmark: 95th percentile (p95) API response latency shall not exceed **300 ms** as measured across all external client transactions.

1.3 Monitoring Window: Compliance is continuously measured through automated HTTP synthetic health checks sampled every 60 seconds against designated service endpoints.

2. Deterministic Service Credits & Payment Adjustment

In the event of an SLA breach, Customer is entitled to financial remedies applied directly against the initial $100.00 payment authorization hold:

Service Metric	Contractual Target	Observed Breach Threshold	Service Credit Percentage	Adjusted Credit Amount
Monthly Uptime	>= 99.9%	< 99.9%	25% of Base Fee	$25.00 USD
Response Latency	<= 300 ms	> 300 ms	15% of Base Fee	$15.00 USD
Severe Outage	>= 99.0%	< 95.0%	50% of Base Fee	$50.00 USD

3. Payment Authorization & Final PayPal Settlement

3.1 Initial Authorization Hold: Customer authorizes a **$100.00 USD** payment hold via PayPal (intent=AUTHORIZE) at the inception of the service cycle.

3.2 Breach & Credit Deduction: Upon verification of an uptime breach below 99.9%, the settlement rules engine calculates a **$25.00 USD** SLA credit.

3.3 Final Capture Execution: Following designated human review, PayPal captures exactly **$75.00 USD** with final_capture: true. The uncaptured **$25.00 USD** authorization balance is automatically released to the Customer.

4. Authorization & Signatures
